

## Closed Circuit Water Chiller for 2KW Fiber Laser , Brand New

### Seller Info

Name: teyu2014  
First Name: teyu2014

### Listing details

#### Common

Title: Closed Circuit Water Chiller for 2KW Fiber Laser  
Price: 115,100.00  
Description: SKYPE: teyuchiller  
Email: [marketing@teyu.com.cn](mailto:marketing@teyu.com.cn)  
Website: <https://www.teyuchiller.com>

Closed circuit water chiller CWFL-2000 is specially designed for cooling 2000W fiber laser of fiber laser metal cutting machine. It is produced by Guangzhou Teyu Electromechanical Co., Ltd (also known as S&A), a professional China-based chiller unit manufacturer with 16-year experience.

Recirculating water chiller CWFL-2000 is characterized by the cooling capacity of 6500W and the temperature control accuracy of  $\pm 0.5^{\circ}\text{C}$ . With dual temperature control system, air cooled dual temperature water chiller CWFL-2000 can cool the fiber laser device and the optics/QBH connector at the same time, which is space saving and cost saving.

Closed circuit water chiller CWFL-2000 has two temperature control modes as intelligent & constant temperature control mode. Under constant temperature control mode, the water temperature can be set as a fixed value as required. Under intelligent temperature control mode, the water temperature will be adjust itself according to the change of the ambient temperature, which greatly avoid the condensed water.

Recirculating water chiller CWFL-2000 has got the approval from CE, REACH, RoHS and ISO. It can be applied to cool fiber lasers of different brands, such as IPG, SPI, Trumpf, nLight and so on.

Condition: Brand New
