Description: Ardent Hibok-Hibok Spring Resort is one of the known site in Camiguin for both local and foreign tourists. I believe it is because of its calming effect it can give to an individual. A visit to ardent is a great way to release stress after a day or week of work. While backpackers and adventurers will surely love soaking in this hot spring after their long travel, island exploration and adventure in the Island of Camiguin.

Ardent Hibok-Hibok Spring Resort is a natural hot spring heated by Mt Hibok Hibok, an active volcano in the country. It is located at the foot of Mt Hibok-Hibok, Mambajao, Camiguin and this natural hot spring can reach up to 40 °C in terms of water temperature.

40 °C may sound pretty intense to others but not all pools here have the same temperature. There are 6 pools in Ardent with different water temperature so I am sure you'll find a pool that will suit on your standards. All 6 pools are connected to one another however they are layered or in a form of a falls so one can still identify each of the 6 pools. I find the top most layer as the hottest and the lower layer the moderate one (I couldn't say it is cold).

Ardent Hibok-Hibok Spring Resort is operating 24 by 7 therefore people can visit the place anytime they want. How cool is that? Aside from that, Ardent is a smoke free vicinity so please refrain from lighting your cigarettes during your stay here. The only smoke I saw during my visit in Ardent were the smokes emitted by the water due to its water temperature. As I am talking with Ardent's vicinity, let me take this chance to commend the caretakers of this place. Aside from the fallen leaves that is just natural because the place is covered with tall trees and plants, I didn't noticed any trash or waste in the place.

I really recommend visiting this place. Especially after a long drive, travel or adventure in the island of Camiguin. A nice way to relax those muscles and also your mind.

One of the main attractions of Camiguin aside from White Island is Ardent Hot Spring. It is situated 6 kilometers southwest of Mambajao specifically in Esperanza Tagdo, Mambajao, Camiguin in the Philippines. This is also considered as the most popular hot spring in the island. It is a natural pool of about 39 °C coming from the bowels of Mt. Hibok-Hibok.

Before, Ardent Hot Spring used to be a four-tiered pool of varying depth and warmth with the hottest one located on the top. But because of the increasing number of tourist, they added two smaller pools. Also, because of the recent earthquake that struck the island, the hot water coming from Mt. Hibok-Hibok has moved to a different location. The management had to change the route and the pool with the hottest temperature is now located in the bottom part.

Ardent Hot Spring has a beautiful landscape with natural stone formation, shrubs and decorative plants. There are cottages, restaurants, coffee shops and dormitory facilities provided for both local and foreign tourists. There are also picnic huts, cook-out facilities and restrooms provided for day.
