Listing details

Common

Title: Spathiphyllum wallisii (Peace Lily)- Potted Plant
Price: 300.00
Description: 300.00 pesos per potted plant.

The Peace Lily is an exceptionally widespread world-wide flower plant that embellishes both interior and exterior spaces.

It is a perennial, evergreen rhizomatous herbaceous flower plant of spherical shape and upright in form. Its extremely attractive foliage is symmetrical, of medium texture and density. If it is planted on the garden soil it shows remarkable spreading growth, covering spaces.

'Peace Lily' is a herbaceous perennial typically grown as a houseplant. While it can grow up to 6 ft tall, it more typically grows to 3 ft in an indoor setting. It is popular as a specimen or accent in interior groupings for its deep-green glossy foliage and white blooms that are intermittent in medium lighting and long-lasting. The plant has no specific bloom time, but flowers freely and tolerates heavy shade.

This is a low-maintenance plant with beautiful glossy green leaves and the unusual ability to blossom in medium light. The pure white flower changes to pale green after 10 days and then remains lovely for at least another month.
